CONSIDER BOOST IN WATER RATES FOR FRANKFORT

On Monday evening the Water Committee of the Frankfort Village Board met to discuss the water problem.

During the last year a new well has been put into operation to increase the potential supply from the old well which for years has been inadequate. The present system now in operation is complete and modern in every detail including chlorination which will, in the very near future, be required by the state.

During the meeting water rates were discussed, at which time it was brought to the attention of the committee that the rates now in effect were adopted in 1915.

Beginning January 1st, 1952 to December 1st, 1952 the total water revenue from all sources, which include new taps, was \$3486.36. Total expenditures for same period were \$3730.45.

Our maximum water rate now is \$4.00 per year. It was also determined that approximately 40% of the 236 users are on a minimum rate.

The water committee suggested the following changes: A minimum rate of \$5.00 every 6 months. This applies to all users. The minimum was raised from 5 to 10,000 gallons every 6 months. The following rates were suggested:

Old Rate - Rate per M	New Rate per M
10-20,000 gals.	35c
20-30,000 gals.	30c
30-40,000 gals.	27½c
40-50,000 gals.	23c
50-60,000 and over	20c

The above recommendations will be discussed in great detail at the next regular village board meeting on Monday, December 15, 1952. Any recommendations or complaints will be heard at this meeting.

It is necessary that we as a village not only operate on a paying basis but that we build a reserve for necessary repairs and replacements which become necessary as our system gets older.—Frankfort Water Committee.

Souvenir Plates of Mokena Methodist Church Available

The WSCS of the Mokena Methodist church has acquired a supply of souvenir plates on which are etched a picture of the church today and as originally built in 1867, except for a slight change in the tower, which is not as high now as when the church was built. The legend on these plates reads: "Mokena Methodist Church, Mokena, Ill. Founded December 15, 1867". This is the first souvenir plate of a landmark in this territory available up to this time.

Inasmuch as additions to and remodeling of the old church may soon change its present appearance—these changes being necessitated by a congregation which has outgrown the present edifice—these souvenir plates offer an opportunity for parishioners and other residents of this area to acquire a lasting memorial of the old church as it has stood for the greater part of a century. The plates are of regular size and good quality china. The etching is done in black. They can be used for serving at dinner, and will make a delightful addition to any housewife's collection of souvenir plates.

A souvenir plates such as this at the table when guests are being served, can be depended upon to spark a new subject and open up whole avenues of conversation that will prove interesting and informative.

The plates can be obtained for a nominal price, but the supply is limited. Those who wish to augment their collection of souvenir plates with this worthwhile memento of early Mokena should contact Mrs. Jessie Sippel, Mokena 3681.

Three Joliet Boys Win Budd Medal For Saving Life

Fast thinking and prompt action on the part of five employees of the Public Service Company of Northern Illinois saved six lives in 1952. Each was awarded life saving medals at a conference of utility officials Chicago, December 3.

The presentation of the Britton I. Budd Medals for the Saving of Human Life was made to Paul Hum, Chicago; Arthur T. Havell, Jr., Bellwood; Louis F. Larson, Joliet; William A. Lux, Joliet; and James C. Baird, Joliet, a temporary employee this summer who is now a sophomore in engineering at the Citadel in Charleston, S. C.

The five 1952 awards bring the total number of persons to receive the medal to 111 since it was established 27 years ago by Mr. Budd, former president and vice-chairman of the utility who retired last summer. Its purpose is to stimulate interest in safety and preparedness and to give recognition for outstanding examples of prompt action and presence of mind in coping with physical emergencies.

Hum won his medal by applying artificial resuscitation on a victim on a Wisconsin lake as the rescue boat headed for shore. Havell's quick presence of mind enabled him to pull a youngster

from the live wires of the Chicago, Aurora and Elgin railroad with his own clothing as a crowd stood by afraid to go near victim who had climbed up to watchman's tower and had accidentally made contact with the wires. Larson's prompt use of artificial resuscitation was credited with saving the life of a near-drowning man at Legion Lake, in Plainfield.

Lux, using the newly-approved back pressure-arm lift method of resuscitation, which had been taught all Public Service employees only a few weeks before, saved two Joliet Boy Scouts from possible carbon monoxide deaths as they sat in automobile during special night maneuvers of the troop.

Baird's prompt use of artificial resuscitation on a girl who had been pulled from canal at the Jefferson Street bridge in Joliet late last summer quickly restored breathing before fire department inhalator squad took over to complete the life-saving effort.

Sangmeisters Move From Camp Cook As Oil Inundates Camp

Cpl. and Mrs. George Sangmeister, Jr. of Frankfort, who have been stationed at Camp Cook in California, where he is in the service and she is secretary to the army colonel at the army hospital there, moved with the entire camp yesterday, December 10, to Fort Lewis, Washington. The reason for the migration to Fort Lewis was because oil was recently discovered at Camp Cook.

When the government bought this land for Camp Cook the purchase was made subject to the condition that the land would revert back to the owner in the event of the discovery of oil. The government has now released the property to the former owners, and the exodus to

Fort Lewis has become necessary.

Village Players to Give Play in Feb.

The Mokena Village Players met Tuesday evening, December 2, in the home of Herta Hamilton, at 8 o'clock. At the November meeting in the home of the George Bill's, the president, Leo Marcoux, thanked everyone for their help in the recent play, "Mother Is a Freshman," produced by the Players. It was decided the two evenings of the play were great success financially and an evening of entertainment for Mokena people.

Marion Owen, the director of the next play, presented several plays for the Players to consider for the February production.

Attend Milk Assn. Meeting in Chicago

Charles Erickson and Walter A. Minger of Mokena Pure Milk Association, and Henry Bornet of Tinley Park PMA local, attended the annual delegates meeting of the association at the Conrad Hilton Hotel, Chicago last week. Delegates from 131 different locals were present, representing the more than 14,500 farmer members of PMA. Local delegates, who attended the meeting, stated that some by-law revisions were made to

keep pace with the growth and progress of the association. One of the important by-law changes established a uniform procedure for districts and locals when selecting officers.

Treasurer H. C. Vielt in making the financial report, pointed out that the association's net operating cost of 2.8 per hundredweight was the lowest in several years. The strong financial position of the association is in-

dicated by its net worth of \$3,136,000.

"Chicago's milk supply has been greater than that of any other big city," Walter E. Winn PMA president, declared. In contrast to Chicago, there were lower supplies for the rest of the nation. The nation's milk supply, is the lowest per capita in 25 years, has caused high manufactured milk prices and resulted in a more stable market for the Chicago area producers.

V.F.W. Aux. News

The regular meeting of the Ladies Auxiliary to Wm. Martin Post No. 725 was held last Thursday evening in Veterans hall. Mrs. Ida Hilgendorf was welcomed as a new member. Anyone whose husband, son or brother is serving, or has served in a foreign country is cordially invited to join our Auxiliary.

In the absence of the hospital chairman, Mrs. Bertha Ziesmer reported the Christmas party for the TB ward at Oak Forest hospital would be held Sunday, December 21. There are about 30 veterans in this ward. Mrs. Mildred McMillan, child welfare chairman, reported that about \$25 had been collected in the penny banks that were sent to the Auxiliary members for that purpose.

The card party for the benefit of the Illinois cottage of the National Home at Eaton Rapids, Mich., will be held in January. The following committee was appointed to purchase linoleum for the kitchen floor: Mrs. Alma Peterson, chairman, Mrs. Olive Williams, and Mrs. Ziesmer. Mary Clark, Publicity chair.

1953 FORD TO—

(Continued from front page) cars this company has built since the late Henry Ford organized it in June, 1903.

To designate the 1953 Ford as the 50th Anniversary car, a medallion has been placed on the top of the steering column in combination with a new half-circle horn ring. Around the Ford crest in the center of the emblem are the words: "50th Anniversary—1903-1953."

L. W. Smead, general sales manager of Ford Division, said that Ford's "new miracle ride" brings to the high volume field for the first time the smooth riding characteristics of much heavier, costlier cars. It is smoother, softer and permits the car to hug the road at high speeds and low, on rough roads as well as on smooth pavement.

The 1953 Fords are available in the following models: Mainline: Tudor and Fordor sedans business coupe and two-door Ranchwagon; Customline: Tudor and Fordor sedans, club coupe and four-door Country Sedan; Crestline: Victoria, Sunliner convertible and Country Squire four-door station wagon.

Known as the world's largest builder of V-8 engines, Ford features its Strato-Star V-8 engine as the only V-8 in the high volume field. Its 110 horsepower is the highest in this field. Also available on the 1953 Ford is the Mileage Maker Six—the most modern designed 6 in the industry—with free-turning over head valves. This 6-cylinder, high compression, low-friction engine is rated at 101 horsepower and was introduced on the 1952 Ford. It has won high praise among Ford owners for its unusual economy and powerful performance. Both engines are designed to operate on regular gasoline.

Ford front seats have automatic posture control, including non-sag springs covered with a thick foam rubber seat pad and a seat track mechanism for fore-and-aft adjustment of 4.1 inches. During this adjustment the seat

cushion rises one-half inch while the seat back tilts forward 1.8 inches to properly accommodate shorter drivers in the extreme forward position. Rear seats in all models also are covered with a cushion of foam rubber.

Netters Open Season In KanWill League

The newly formed Frankfort Netters will open their basketball season away from home, Sunday, December 14 at 2 p. m. by engaging in a battle with Grant Park.

The team, which is sponsored by the American Legion, belongs to the KanWill Basketball League and is made up of the following teams: Peotone, Beecher, Manteno, Steger, Grant Park and Frankfort.

Don Bushen and Grovenor Weichbrodt will play the guard position. Forwards will be Ron Schaper, Leonard Bushen, Bob Emperor, Bud Patrick, Wesley Depotto and Richard Vaughn.

Ken Oetter, a playing coach, has announced the first home game will be played December 16 at 9 p. m. in the Frankfort gymnasium against Peotone.

Zoning Board Denies Request For Tourist Cabins on Route 7

Will County's zoning board of appeals, which met Monday evening, December 1, to conduct public hearings in four townships on six rezoning bids, voted unanimously to allow the requests for rezoning made by John and Janet Pusch, Joliet road, just east of New York Central tracks, New Lenox, from R-1 to B-1 for a grocery store and delicatessen.

They also granted the request of Kata and Vinko Celec, one half mile south of Cook county line on east side of 4-A, Homer township, from R-1 to B-1, for a grocery store and general merchandising.

Several persons were at the hearing in New Lenox but no objections were raised. The Puschs, who were asking for the change there presented the board with a petition bearing 14 signatures of persons in the nearby neighborhood, agreeing to a change from R-1 to B-1 so that the grocery store can be started there.

The appealing board denied the request of Paul Lippegan, for a B-4 zone for a trailer camp or tourist cabins on route 7 in Homer township. Barney Welter, the supervisor, raised an objection to Lippegan's plan to build tourist cabins on his property on Route 7, on the grounds that the county has, up to this time, found no effective way to tax trailers, and that a B-4 zone, such as sought by Pipman, would permit trailers. The supervisor

pointed out that about 66 per cent of the money in Homer township's general assistance fund has gone to persons living in trailer camps.

Holm's Holsteins Lead DHIA Assn. 1 During November

According to the November report of Frederick Holm, tester for Dairy Herd Improvement Assn. 1, the Holstein herd owned by Louis Holm & Son, Mokena, led this group last month with an average production of 1013 pounds of milk and 37.7 pounds of fat.

Other high ranking herds in this group last month, with productions, were owned by the following: Louis Lauffer & Son, Mokena, Holstein, 983-36.2; Walter Lauffer, Tinley Park, Holstein, 991-35.8; George Beutel & Sons, Mokena, Brown Swiss, 742-35.1; Mall Tool Company Farms, Crete, Holstein & Brown Swiss, 840-34.8.

I. A. Ruder, Monee, was owner of the highest producing individual, a Holstein which produced 1820 lbs. of milk and 87 lbs. of fat during November.

Other high ranking individuals all Holsteins, with productions, were owned by the following: Wm. Bernard & Sons, Mokena, 1760-86; Herbert Kohl, Matteson, 1880-82; Schifler & McGlasken, Frankfort, 1970-79; Wm. Bernard & Sons, 1330-75.

Taxpayers Want Referendum On All New Taxing Powers

Voting results at the Peoria and Springfield taxpayer town meetings of the Taxpayers' Federation of Illinois indicate that taxpayers are overwhelmingly in favor of referendum on any new or increased taxing power for their local governments (91% for referendum control, 9% against); that about one out of three are of the opinion that the schedule for truck license fees, voted by the General Assembly is too high (35% too high, 14 per cent too low, 51% about right); that they are closely divided on the questions of legislation creating the office of county supervisor of assessments, and of increased State aid for schools if it means increased State taxes (46% for and 54% against in both cases). Of those favoring creation of the office of county supervisor of assessments, 37% wanted the legislation to be mandatory for all counties, 18% favored permissive legislation with the decision left to the county board, and 45% favored permissive legislation with the decision to be made by referendum in each county.

Stratton to Work With Crime Prevention, Inc.

William G. Stratton, governor elect of Illinois, told officials of Crime Prevention, Inc., he will join wholeheartedly with them in the crime prevention program when he is governor. He said his sports-recreation program which he recently proposed would be integrated with the Anti-Crime crusade, undertaken in Cook county with public officials and a citizens' advisory group.

Stratton said that the Crime Prevention Division would be put back in the Department of Public Safety where it had always been until the Stevenson administration scrapped it. Stratton also pointed out that in the first biennium of the Stevenson administration there had been no appropriation made for this vital work, but the the Republican controlled legislature had allocated \$30,000 for this very necessary work at the 1951 general assembly.

Stratton said the state will take an active part in the program now under way in Cook county and will extend the program where needed downstate. He said his program to foster Junior Olympics and recreational activities will fit into the Anti-Crime program now under way.

He stressed that all these activities will not replace, but will augment the educational and junior sports organizations now fostered by the Cook County Crime Prevention Bureau.

Lists Problems Now Facing Dairy Men

"It's time we face the facts in the dairy industry," said A. L. McWilliams, General Manager of the Pure Milk Association, Chicago, in an address to the annual meeting of the Illinois Milk Producers Association in Chicago, November 18. Four major trends established during the past few years, according to McWilliams, clearly indicate the extent of the problem now contributing to dairy farming. McWilliams lists these as follows:

1. Lower milk production, 2. Increased distributing efficiency, 3. Processing Milk, 4. Dairy product substitutes.

"Increased efficiency in milk distribution," McWilliams declared, "is the aim of larger dairies with great investments. The small dairy plant operator is going the way of the horse and buggy." Quoting from the

sales records of the Pure Milk Association, McWilliams went on to say, "over the past 6 years one-third of the dairies in the Chicagoland area have gone out of business. The paper bottle, McWilliams added, "a mass production item, has extended the range of milk delivery over a wider area. The larger container such as the 2 quart bottle and the gallon container require substantial volume to be handled economically."

From where I sit... by Joe Marsh

They'll Do It
Every Time

You know where Hammy Jackson lives—on that small dead-end street off Maple Avenue near the library? Well, about a month ago, the town finally put up a sign on the corner there saying: "No thoroughfare... Dead End."

Yesterday Hammy dropped by to see us. "Can't understand it," he says. "Hardly anybody drove down our street before—but now, since they put that sign up, there's been more cars than ever turning around in my driveway."

From where I sit, these people who bother Hammy on his one-

way street are the same as those who automatically ignore a Wet Paint sign and touch their finger on a freshly painted surface. But you can't change human nature. People like to find out for themselves—and then make their own decisions.

That's why I say "live and let live." You can drink your butter-milk, but let me have my glass of beer when I choose. And let's not feel we're obliged to "point the way" for the other fellow.

DEPRECIATION

By Robert Schweizer

Depreciation is a very important item of expense on business and farm income tax returns. In fact, on most farm returns depreciation is the largest single item of deductible expense. Therefore, it is imperative that complete and accurate records are kept of every purchase, sale, trade in, or abandonment of depreciable items.

Section 23 of the Internal Revenue Code states that depreciation is a reasonable allowance for the obsolescence, exhaustion and wear and tear of property used in the trade or business or property held for the production of income. In other words, depreciable items are items not for sale in the ordinary course of business nor includible in inventory but used in business or farming and which have a useful life of more than one year.

Thus, such items as automobiles used solely for pleasure, taxpayers' homes, furniture in a private dwelling or personal effects are not depreciable. However, if any of the above items are used partly for business then

depreciation, for the part used in business may be deducted. Obviously, it is very difficult to determine with any degree of certainty the exact number of miles a pleasure automobile is used on business. But in order to claim a deduction a taxpayer must be prepared to prove the reasonableness of his claim for depreciation.

Regulation 111 further states that the proper allowance for such depreciation is that amount which should be set aside for the taxable year in accordance with a reasonably consistent plan, whereby the aggregate of the amounts so set aside, plus the salvage value, will, at the end of the useful life of the depreciable property, equal the cost or other basis of the property. For a reasonably consistent plan, the Commissioner favors the "straight line" method, which assumes that depreciation will be identical every year during the useful life of a given item. A reasonable rate for depreciation is dependent not only on the prospective useful life of the property when acquired, but also on the particular conditions under which the property is used as reflected in

the tax payers operating policy and the accounting policy followed with respect to repairs, maintenance, and replacements.

Bulletin "F" issued by the Internal Revenue as a guide for useful lives and depreciation rates points out that the estimated useful lives and rates of depreciation indicated are based on averages. Thus, they are based on the usual experience of property owners, on a reasonable expense policy as to the cost of repairs and maintenance, and on normal obsolescence. They do not contain any provision of extraordinary obsolescence, such as is occasioned by revolutionary inventions, abnormal growth or development, radical economic changes, or other unpredictable factors which may force the retirement or other disposition of property prior to the termination of its normal useful life.

Following are Bulletin "F" indicated useful lives in years, for some of the various assets used in Agriculture:

Animals: Cattle, breeding or dairy 8; Hogs, breeding 5; Horses, breeding or work 10; Sheep, breeding, 5; Conveyors and ele-

vators 15; Cribbs, Corn 30; Cultivators 15; Elevator machinery, grain 15; Harvesters 15; Hoists and forklifts 12; Loaders, Hay and Seed 10; Milking Machines 20; Planters 15; Plows 15; Seeders 15; Separators 15; Engines: Diesel 15, Gasoline 10 steam 20; Fences: Snow 8, Wood 15, Woven wire 15; Silos: Concrete 50, Metal 25, Wooden 20; Sowers: Grain 15, Lime 8; Threshing machines 15; Tractors 10.

The above is only a small portion of the complete list shown in Bulletin "F" but should give an idea of what the Bureau considers average lives. Naturally, the above lives are for new properties only. On a composite basis, agricultural property is generally divided into buildings, taking approximately a 50-year average life, and machinery and equipment, taking a 15-year average life.

In conclusion, emphasis must be placed on the fact that the above lives are only a starting point for determining the correct lives in a particular case, and are not recommended lives. The experience of the taxpayer is the controlling factor. Thus, two farmers living next to each other may have totally dissimilar rates for depreciation.

Tips on Touring

By Carol Lane
Women's Travel Authority

If you are a mother of small fry, you are probably saddled with the job of playing chauffeur almost daily to carfuls of kids.

Two or three offspring of your own are the maximum that are manageable. More than that require special precautions.

When there is a crowd of children in the car, always:
1. Remove the ignition key when you park. Children are not only curious but they may be tempted to turn the key "on a dare."
2. Park with gears in neutral position. (When in gear, the car will jump if the children touch the starter button.)
3. When you stop, set the parking brake tightly. On a hill, turn front wheels into the curb.
4. Have your muffler and tail pipe checked to make sure engine gases are carried back beyond the rear bumper, and as an added safety measure, provide plenty of ventilation.

5. When backing out of a driveway, appoint someone—even a child—as a "watch dog" to make sure small fry do not scurry behind your wheels.
6. Insist that doors be locked both when the car is moving and parked.

Finally, make sure that mother drives children rather than the children driving mother. Insist that horseplay be confined to where horses should play—out in the open, not in the car!

50,000 Boy Scouts To Attend Jamboree Next July in Calif.

What does it feel like to go camping with 50,000 brother Scouts?

Seventy Boy Scouts from Rainbow Council, of which Mokena Boy Scouts are members, are going to have a chance to find out next summer when the Third National Jamboree is held at Irvine ranch in California from July 17 to July 23.

A city about the size of Joliet will spring up with about 30,000 tents. It will be a city with its own electricity, water supply, sanitation, telephone system, food supply, doctors and fire protection. The 1953 Jamboree promises to be the largest and most exciting adventure in the history of scouting.

All Rainbow Council Scouts who will be at least 12 years old as of January 1, 1953, and of Second Class Scout, Explorer Apprentice or higher rank, are eligible to attend the Jamboree. Every Scout attending should have adequate camping experience to enable him to care for himself in the open.

The Rainbow Council group will travel by bus to the camp site which is situated on the beautiful 3,000 acre Irvine ranch one of the few remaining old land-holdings in picturesque Southern California.

The Rainbow Council Jamboree committee, after weighing the pros and cons of rail and bus travel, decided to take the local Scouts to the West Coast by way of a scenic route over the nation's highways. Bus travel, the committee felt, is not only the more economical way of going to the Jamboree but it would give the boys a better chance to see the more interesting sites that will mark the route between Joliet and Irvine Ranch.

A detailed outline of the bus route will be publicized at a later date.

The one important date to remember is Friday, January 2. One place will be reserved for each Troop and Explorer Unit until that date and because it is desired to have representation spread as widely as possible Unit leaders are urged to decide whether it will send a boy to the Jamboree by that date.

A report from the Jamboree committee which met last Tuesday night at the Joliet Arsenal sets the cost to each scout at attending the Jamboree at \$197 which includes the National Jamboree fee of \$48. In addition to the fee the Scout will be required to provide his uniform and personal equipment.

Already signed up to attend this tremendous camp are Sheldon and Everett Hauck of New Lenox.
